Professional Experience

Full Stack Web Development

Tec de Monterrey Bootcamp   **2021**

Project Manager

Managed the Sports Almanac Project with a collaborative team of three people:

Key Contributions:

➤ Served as liaison between the 3-people team and instructors and TAs, documenting draft of project outline, scope, resources and technology. Throughout the working sessions, worked with scrum agile software development techniques of issue structure, assignment, development, testing and deployment. Held biweekly meetings with the team, with additional working sessions to complete the project.

➤ Contributed to the project in the development of the web application with the use of HTML, Materialize CSS, CSS, SASS and JavaScript. Applied tools and techniques learned during the bootcamp, such as APIs and 3rd party APIs.
